SUMMARY

I am an undergraduate IT student at Vaasa University of Applied Sciences focusing on learning React Native JS for frontend mobile development. By creating many small projects for myself to work on, I am developing my knowledge even further on React Native, while also trying to learn some other languages such as HTML, CSS. Through the projects, I also wish to practice my soft skills: the ability to work for long hours without losing enthusiasm, and the mentality of being able to work under pressure.

SKILLS

LANGUAGES

- Java
- JavaScript
- C#
- HTML
- CSS
- SQL

FRAMEWORK

- React Native
- Redux

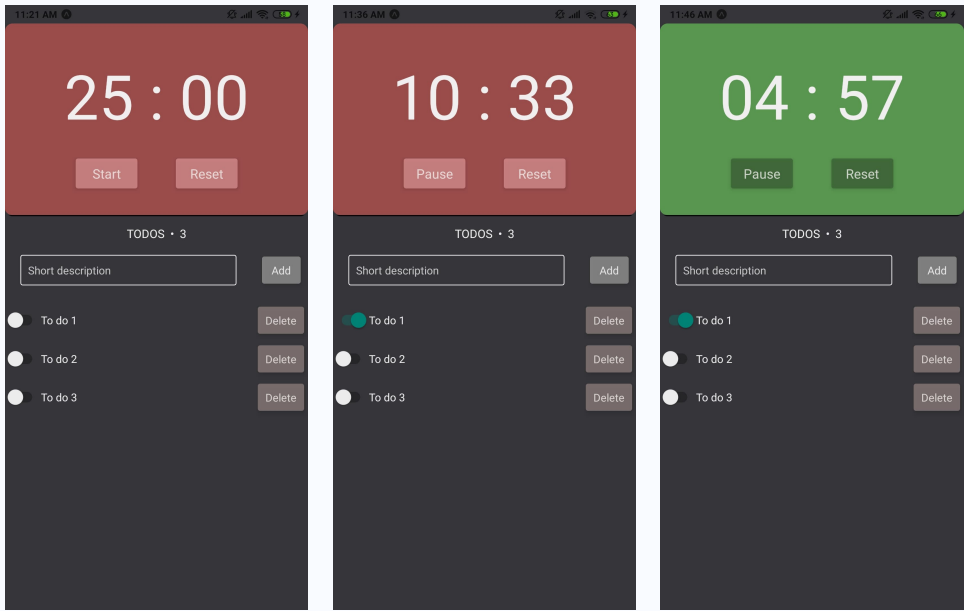

SOFTWARE TOOLS

- Visual Studio (Code)
- Git
- Github

PROJECTS

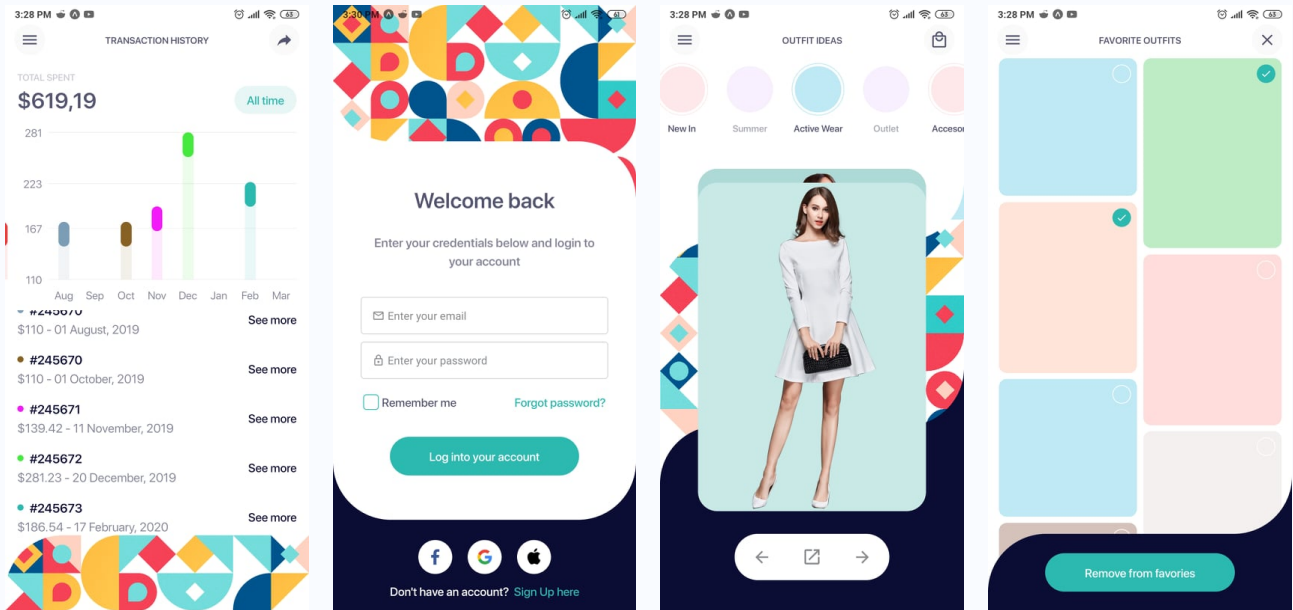

POMODORO TRACKER APPLICATION
